U.S. DEPARTMENT OF
ENERGY

DOE National Laboratory System

<https://edx.netl.doe.gov/sites/sami>

Updated Nov 2020

National Energy Technology Laboratory (NETL)

One of 17 U.S. Department of Energy (DOE) national laboratories; producing technological solutions to America's energy challenges.

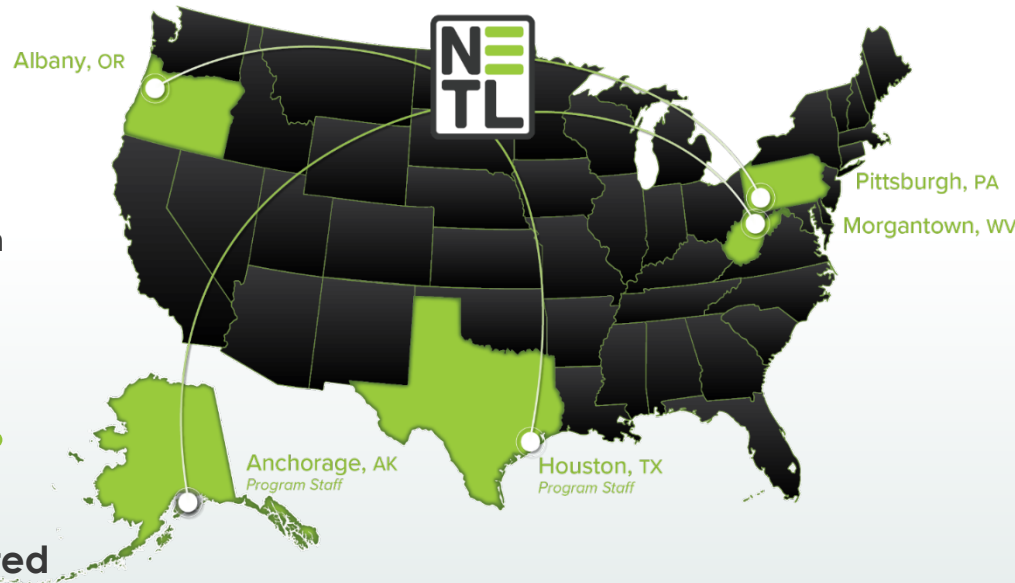

MISSION

Driving innovation and delivering solutions for an environmentally sustainable and prosperous energy future:

- Ensuring affordable, abundant and reliable energy that drives a robust economy and national security, while
- Developing technologies to manage carbon across the full life cycle, and
- Enabling environmental sustainability for all Americans.

VISION

To be the nation's premier energy technology laboratory, delivering integrated solutions to enable transformation to a sustainable energy future.

- NETL has **three research laboratories**
- **Two field office locations**
- Only National Lab **dedicated to carbon management research**
- Government owned & operated
- **One of three applied** national labs
- Leader in cutting-edge research in **conversion** to higher value products
- Flexible **Intellectual Property**

<https://edx.netl.doe.gov/sites/sami>

National Energy Technology Laboratory (NETL)

Organization Snapshot

MISSION

Driving innovation and delivering solutions for an environmentally sustainable and prosperous energy future:

- Ensuring affordable, abundant and reliable energy that drives a robust economy and national security, while
- Developing technologies to manage carbon across the full life cycle, and
- Enabling environmental sustainability for all Americans.

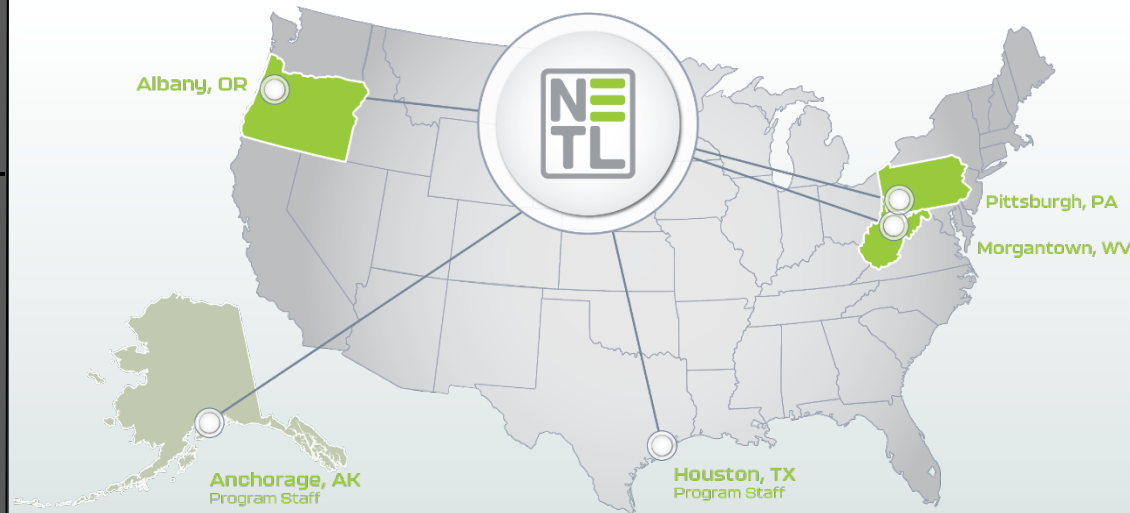

VISION

To be the nation's premier energy technology laboratory, delivering integrated solutions to enable transformation to a sustainable energy future.

MAJOR INITIATIVES

- Decarbonization & Carbon Management
- Environmentally Sustainable Supply Chains
- Integrated Energy & Industrial Systems
- Advanced Data & Computing Solutions for Applied Energy Challenges

3 RESEARCH LABS & 2 STRATEGIC OFFICES

- One of 17 DOE national laboratories
- One of three applied research national labs
- Government owned & operated
- **1000+** R&D projects in 50 states
- **\$5.0B** total award value
- **\$1.3B** FY23 budget

IMPLEMENTS R&D PROJECTS FOR DOE'S OFFICES OF:

- Fossil Energy & Carbon Management
- Energy Efficiency Renewable Energy
- Electricity
- Cybersecurity, Energy Security, & Emergency Response
- Manufacturing, & Energy Supply Chains
- Grid Deployment
- Clean Energy Demonstrations

<https://edx.netl.doe.gov/sites/sami>

NETL Core Competencies

EFFECTIVE RESOURCE DEVELOPMENT • EFFICIENT ENERGY CONVERSION • ENVIRONMENTAL SUSTAINABILITY

COMPUTATIONAL SCIENCE & ENGINEERING

MATERIALS ENGINEERING & MANUFACTURING

GEOLOGICAL & ENVIRONMENTAL SYSTEMS

ENERGY CONVERSION ENGINEERING

STRATEGIC SYSTEMS ANALYSIS & ENGINEERING

PROGRAM EXECUTION & INTEGRATION

High Performance
Computing

NETL Initiatives

STRATEGIC INITIATIVES

KEY LAB INITIATIVES

Science-based AI/ML Institute (SAMI)

An NETL Key Laboratory Initiative (KLI)

- NETL **established** SAMI, a joint institute for AI and ML, **in 2020**
- SAMI is a ***catalyzer of AI- and ML-driven solutions***, to support the acceleration of FECM technologies across the NETL R&D mission space
- Working to address **crosscutting** needs, capabilities, and resources to unlock FECM/NETL's AI technology future and **drive mutual benefits**
- **SAMI is an Institute within the Research & Innovation Center (RIC)**
 - Supports discipline-based research, across discipline boundaries

Data is the Energy for AI!

SAMI Mission

Enabling AI-driven solutions and support to applied energy science, addressing the nation's environmental, economic and social challenges.

Accelerating AI at NETL through SAMI

Meeting our Mission through Five Key Emphasis Areas

ADVANCE AI WORKFORCE

Foster multi-disciplinary AI research and cross-cutting collaborations to cultivate NETL's AI-ready workforce.

CATALYZE PARTNERSHIPS & COLLABORATIONS

Strengthen collaborations in research focus areas, within NETL and with external stakeholders to hasten the development of innovative applied-energy AI solutions.

MAKE DATA ACCESSIBLE

Support the entire lifecycle of data with secure, private, collaborative workspaces for research projects.

INFORM GOVERNANCE & STANDARDS

Ensure the use and development of safe and trustworthy AI.

ACCELERATE AI INNOVATION

Enable NETL to push the frontiers of AI technology and create the next generation architectures, tools and approaches

<https://edx.netl.doe.gov/sites/sami/>

ADVANCE AI WORKFORCE

Foster multi-disciplinary AI research and cross-cutting collaborations to cultivate NETL's AI-ready workforce.

- AI4AE Day
- Panel discussions (e.g., ChatGPT)
- Media stories on AI/ML research at NETL
- SAMI Tech Talks
- SAMI Tech Tutorials
- SAMI Spotlight Series (speakers sourced externally)
- EDX training

LIGHTNING TALKS:

28

SAMI-affiliated researchers presented during AI4AE Day

ATTENDEES:

149

NETL personnel attended the inaugural AI4AE Day

"I just want to let you know that the SAMI workshop was absolutely amazing. I learned so much."

Virtual Fireside Chat

ChatGPT

A conversation about the artificial intelligence sensation

Moderated by Kelly Rose
Introduction by Chung Shih

Wednesday, March 8, 2023 | 1 PM EST (10 AM PST)

<https://edx.netl.doe.gov/sites/sami/>

SAMI is Making AI/ML Information Available

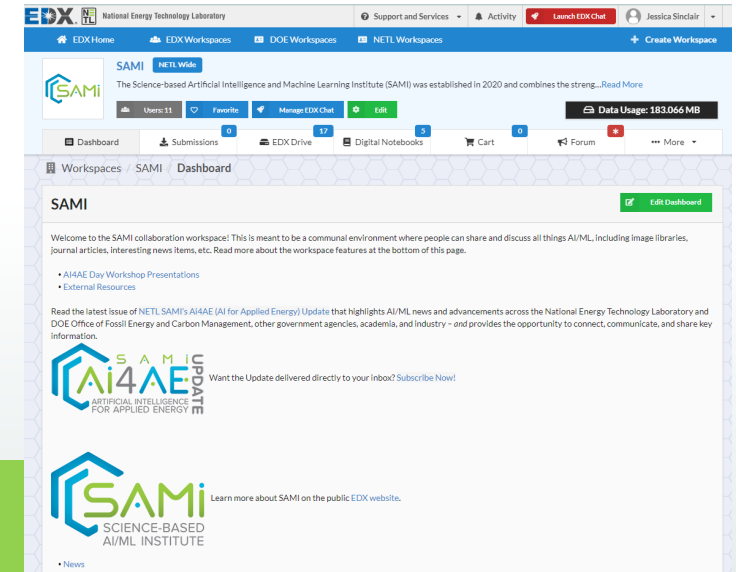

SAMI Website: NETL's current research and accomplishments in AI/ML and learn more about SAMI:

AI4AE Update monthly email learn about applied energy AI at NETL and AI innovations, policy, etc.:

EDX Workspace: Access information on AI/ML, proposal text, data management plan:

Sign up for our AI4AE Update email here:

<https://edx.netl.doe.gov/sites/sami>

CATALYZE PARTNERSHIPS & COLLABORATIONS

Strengthen collaborations in research focus areas, within NETL and with external stakeholders to hasten the development of innovative applied-energy AI solutions.

- Create collaborative opportunities within NETL across all core competencies/RIC directorates
- Work with external stakeholders to further development of AI-driven solutions for applied energy
 - Introducing new technologies
 - Collaborative research
- Collaborate on AI strategy discussions within DOE
- Communications & outreach

<https://edx.netl.doe.gov/sites/sami/>

MAKE DATA ACCESSIBLE

Support the entire lifecycle of data with secure, private, collaborative workspaces for research projects.

Energy Data eXchange®++: For 14 years EDX has served as a data curation and collaboration platform for applied energy RD. Multi-cloud hosted system which:

- enables accelerated development, application and testing of carbon management and fossil energy resiliency models, tools, and data
- supports computing both in the cloud and for authorized users via NETL's on-premise advanced computing clusters, accelerating AI research, validation, and benchmarking for a wide array of applied energy and environmental needs.
- <https://edx.netl.doe.gov/about>

<https://edx.netl.doe.gov/sites/sami/>

INFORM GOVERNANCE & STANDARDS

Ensure the use and development of safe and trustworthy AI.

Inform compliance with federal orders, supporting our mission in a rapidly changing world, for example:

- DOE Public Access Plan
- [Executive Order](#) on the Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence
 - Date signed: October 30, 2023
 - To govern the development and use of AI safely and responsibly, through a coordinated, Federal Government-wide approach to doing so.

<https://edx.netl.doe.gov/sites/sami/>

ACCELERATE AI INNOVATION

Enable NETL to push the frontiers of AI technology and create the next generation architectures, tools and approaches

- Through strategic discussions
 - DOE AI R&D Strategic Plan
 - AI for Science, Energy & Security Workshops
 - AI for Energy
 - AI-related Data Calls
 - FECM AI Strategy & advisory team
 - The Inter-agency AI Community of Practice (CoP)
 - DOE AI Community of Interest
 - AI for Operations Committee
- SAMI Tech Team
 - Data Science projects, research, training, or advisory
- Research

<https://www.energy.gov/fecm/articles/roles-artificial-intelligence-support-fecm-priorities>

ACCELERATE AI INNOVATION

Enable NETL to push the frontiers of AI technology and create the next generation architectures, tools and approaches

CARBON
MANAGEMENT

Legend:

- Light Rare Earth Elements
- Heavy Rare Earth Elements
- Critical Rare Earth Elements
- Critical Minerals

* Gd: IUPAC Light REE; USGS Heavy REE
** Included with rare earth elements
Fluorine: Ca & F
*** Uranium: Fuel Material (USGS 2021)

RESOURCES AND
MATERIALS

INFRASTRUCTURE &
ENVIRONMENTAL
RESILIENCY

BIG DATA, FOUNDATIONAL
DATA & A.I. SOLUTIONS

The following slides contain examples of research innovations in these areas but are not comprehensive of all AI/ML research at NETL.

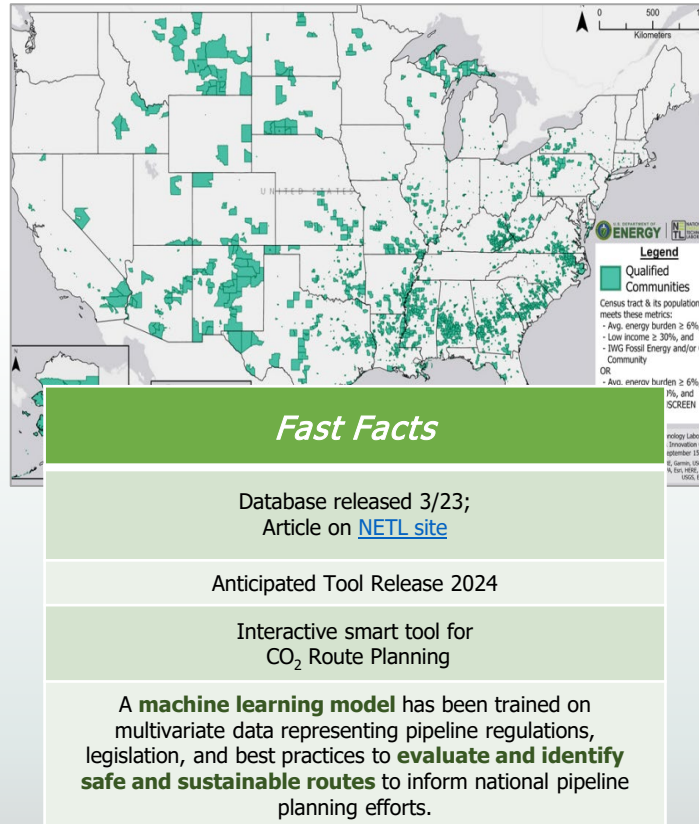

<https://edx.netl.doe.gov/sites/sami/>

Carbon Management

Applied AI for Carbon Capture and Storage Data Products

CO₂ Smart EJ/SJ Route Planning Tool

- The interactive smart tool will assist in planning routes for CO₂ transport across the country. **Explore the [public database](#)**. The Pipeline Route Planning Database team **[published research in Data in Brief](#)** in December.
- Researchers behind the tool met with representatives from industry on collaborative ideas and recently presented the tool at the **FECM Interagency Carbon Transport Topic Team Meeting**.

NRAP Open Source Integrated Assessment Model (OPEN-IAM)

- An **[open-source software product](#)** that enables quantification of containment effectiveness and leakage risk at storage sites in the context of system uncertainties and variability
- The model comprises a set of reduced-order and analytical models of various components of the GCS system and is incorporating a **[Machine and Deep Learning Approach](#)** to overcome deficiencies of the analytical multi-segmented reduced order model.
- NRAP-OPEN-IAM allows for **crosscutting functionality** with the entire NRAP toolset.

Explore the
entire NRAP
toolset:

<https://edx.netl.doe.gov/sites/sami>

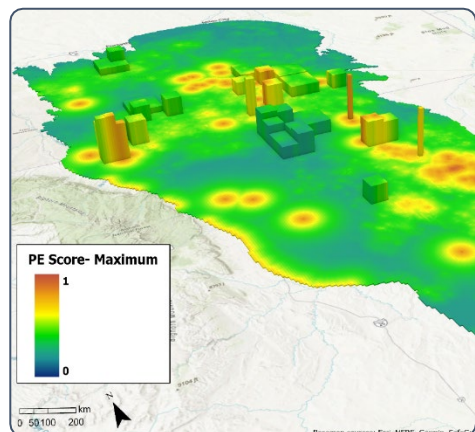

Resources & Materials

Applied AI for REE/CMs and alloy discovery

Federated-AI modeling for improving discovery of domestic critical mineral deposits

- NETL's geologic resource assessment [AI Model](#) helped uncover **the largest unconventional deposit of magnetic rare earth elements (REE) in the U.S.**
- The AI model** was tested at a coal mine in Wyoming's Powder River Basin and revealed the **largest unconventional deposit of magnetic REEs discovered in the US.**
 - [Featured in the Wall Street Journal - WSJ](#)
 - Also featured in energy trade journal, [JPT](#)
- In the last year, NETL has released [five, peer-reviewed, data-driven products](#) that help characterize unconventional critical minerals

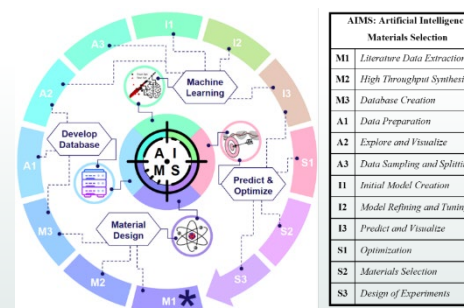

Machine learning prediction and outlier detection for alloy development and AI for alloy discovery

- Clustering: assessing trends in materials data
- Integrating domain knowledge into analysis
- Assessing outliers to the dataset

Wenzlick, M., et al. *J of Mat Eng and Perf*, 2021.
<https://doi.org/10.1007/s11665-020-05340-5>

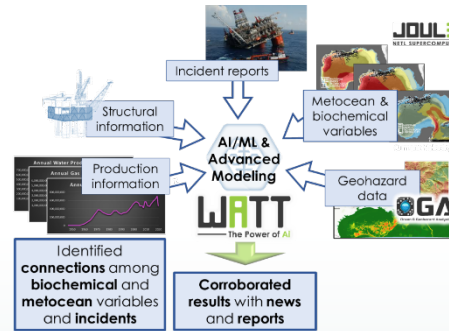

The [Artificial Intelligence Materials Selection Framework](#) is used to develop a high-quality database for compositions, processing, and test parameters for various responses of alloys, as well as predict optimized materials for multi-objective problems.
<https://doi.org/10.1016/j.actamat.2022.117751>

Infrastructure and Environmental Resiliency

Applied AI for Extreme Climate & Infrastructure Resiliency

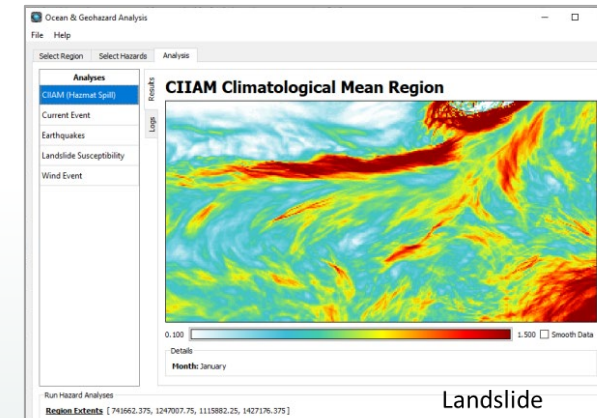

Award winning AI/ML Multi-Model Forecasting Infrastructure Integrity

Artificial Intelligence (AI) Enhanced Workflow for Natural Hazards Forecasting

Data driven AI/ML analytical models and tools rapidly forecast and predict offshore hazards based off metocean and subsurface environments

- Gradient Boosting Classifier
- Artificial Neural Network

Fast Facts

[AI Multi-Model Tool](#) - coming in 2024

Evaluating infrastructure integrity and [forecasting remaining useful lifespan and risk likelihood](#) through applied **Machine Learning (ML) models**

Multiple ML models (**two gradient boosted decision trees and one artificial neural network**) have been trained to evaluate comprehensive datasets for pipelines and platforms

Offshore infrastructure reuse potential, lifespan extension, remediation and safe-use strategies, identifies potential vulnerabilities

Fast Facts

[Version 2 Tool](#) released 3/23

AI/ML Smart Tool

Improves characterization and forecasting of seabed and metocean hazards

Reduce risks to operations, including carbon storage activities, and the environment

Landslide Triggers

Conductive Conditions

- Hydrates
- Faults
- Seeps & more
- Slope
- Curvature
- Sediment Type
- Geomorphology & more

Output Landslide Susceptibility Map

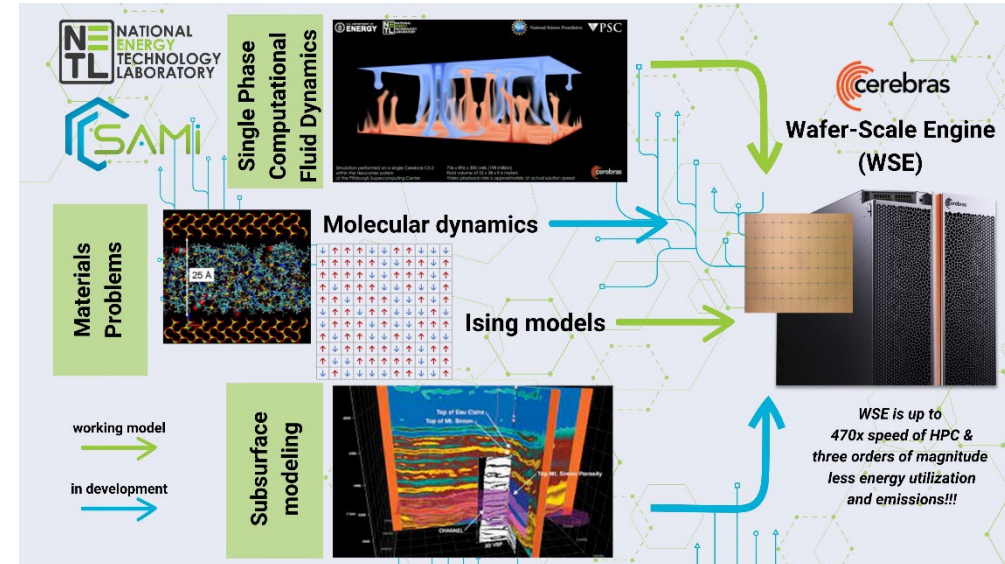

<https://edx.netl.doe.gov/sites/sami>

Big Data, Foundational Data, and AI Solutions

Cutting-Edge, advanced AI computing & modeling, accelerating solutions to real world challenges

- The NETL-developed [WFA programming interface](#) for the wafer-scale engine allows researchers to tackle tough AI problems from materials and [climate modeling](#) to computational fluid dynamics to molecular dynamics to [AI-accelerated](#) scientific computing.
- The wafer-scale engine has up to 470x the speed of HPC with **3 orders of magnitude** less energy usage and emissions
